

Supported Version Interoperability for Software AG Products

This document lists combinations of products from different releases that are officially supported by Software AG. Cross-release combinations not listed here are not supported unless specifically noted in product documentation. In general, products from the same release always work together.

Core Products in 10.3 Release

Product in 10.3 Release	Support
Apama 10.3	Interoperate with Universal Messaging 9.12, 10.1 (using JMS but not using Universal Messaging Connectivity plug-in)
API Portal 10.3	Interoperate with API Gateway 10.1
CloudStreams Server 10.3	Interoperate with Connector 9.10, 9.12, 10.1
Software AG Designer Service Development 10.3	Interoperate with Integration Server 9.7, 9.8, 9.9, 9.10, 9.12, 10.1
Enterprise Gateway 10.3	Interoperate with (internal) Integration Server 9.7, 9.8, 9.9, 9.10, 9.12, 10.1
Terracotta DB 10.3	Interoperate with webMethods Adapter for Terracotta DB 10.1 Fix 2
Trading Networks 10.3	Interoperate with API Gateway 10.1, 10.2 (API Management feature)
Universal Messaging Server 10.3	Interoperate with Apama 9.12, 10.1 (using Correlator-integrated JMS but not using Universal Messaging connectivity plug-in)
	Interoperate with Integration Server 9.12, 10.1
	Interoperate with Universal Messaging Java clients (except admin API) 9.12, 10.1

Core Products in 10.1 Release

Product in 10.1 Release	Support
Apama 10.1	Interoperate with Universal Messaging 10.3 (using Correlator-integrated JMS but not using Universal Messaging connectivity plug-in)
API Gateway 10.1	Interoperate with API Portal 10.3, Trading Networks 10.3 (API Management feature)
CloudStreams Server 10.1	Interoperate with Connector 9.10, 9.12
Software AG Designer Service Development 10.1	Interoperate with Integration Server 9.7, 9.8, 9.9, 9.10, 9.12
Enterprise Gateway 10.1	Interoperate with (internal) Integration Server 9.7, 9.8, 9.9, 9.10, 9.12
Integration Server 10.1	Interoperate with Software AG Designer Service Development 10.3, Universal Messaging 10.3
Universal Messaging server 10.1	Interoperate with Apama 9.12 (using Correlator-integrated JMS but not using Universal Messaging connectivity plug-in), 10.1 (using JMS but not using Universal Messaging connectivity plug-in)
	Interoperate with Integration Server 9.12
	Interoperate with Universal Messaging Java clients (except admin API) 9.12
webMethods Adapter for Terracotta DB 10.1 Fix 2	Interoperate with Terracotta DB 10.3

Core Products in 9.12 Release

Product in 9.12 Release	Support
Apama 9.12	Interoperate with Universal Messaging 10.3 (using Correlator-integrated JMS but not using Universal Messaging connectivity plug-in)
ActiveTransfer 9.8	Interoperate with Integration Server 9.8, 9.9, 9.10
CloudStreams Server 9.12	Interoperate with Connector 9.10
Software AG Designer Service Development 9.12	Interoperate with Integration Server 9.7, 9.8, 9.9, 9.10
Enterprise Gateway 9.12	Interoperate with (internal) Integration Server 9.7, 9.8, 9.9, 9.10
Integration Server 9.12	Interoperate with Software AG Designer Service Development 10.1, 10.3; Universal Messaging 9.9* (JMS messaging only), 10.1, 10.3
Universal Messaging server 9.12	Interoperate with Integration Server 9.7*, 9.8*, 9.9*, 9.10*

Core Products in 9.10 Release

Product in 9.10 Release	Support
ActiveTransfer 9.8	Interoperate with Integration Server 9.8, 9.9
Software AG Designer Service Development 9.10	Interoperate with Integration Server 9.7, 9.8, 9.9
Enterprise Gateway 9.10	Interoperate with (internal) Integration Server 9.7, 9.8, 9.9
Integration Server 9.10	Interoperate with ActiveTransfer 9.8 from 9.12 release; Software AG Designer Service Development 9.12, 10.1, 10.3; Universal Messaging 9.12*
Universal Messaging server 9.10	Interoperate with Integration Server 9.8*

Core Products in 9.9 Release

Product in 9.9 Release	Support
ActiveTransfer 9.8	Interoperate with Integration Server 9.8
Software AG Designer Service Development 9.9	Interoperate with Integration Server 9.7, 9.8
Enterprise Gateway 9.9	Interoperate with (internal) Integration Server 9.7, 9.8
Integration Server 9.9	Interoperate with ActiveTransfer 9.8 from 9.10 and 9.12 releases; Software AG Designer Service Development 9.10, 9.12, 10.1, 10.3; Universal Messaging 9.12*
Universal Messaging server 9.9	Interoperate with Integration Server 9.7*, 9.8*, 9.12* (JMS messaging only)

Core Products in 9.8 Release

Product in 9.8 Release	Support
Software AG Designer Service Development 9.8	Interoperate with Integration Server 9.7
Enterprise Gateway 9.8	Interoperate with (internal) Integration Server 9.7
Integration Server 9.8	Interoperate with ActiveTransfer 9.8 from 9.9, 9.10, and 9.12 releases; Software AG Designer Service Development 9.9, 9.10, 9.12, 10.1, 10.3; Universal Messaging 9.9*, 9.10*, 9.12*

Cross-Product Tools

Product	Support
Command Central	<p>Each release of Command Central can install, patch, configure, manage, and upgrade supported Software AG products of the same release or earlier.</p> <p>Software AG recommends always using the latest version of Command Central so you can take advantage of the most up-to-date features. See <i>Software AG Command Central Feature Support Matrix</i> for information on Software AG products supported by Command Central.</p>
Deployer	<p>Each release of Deployer can deploy Software AG server assets for the same release or earlier to and from that release. For example, Deployer 10.3 can deploy Software AG server assets 9.7 to 9.7, 9.8 to 9.8, 9.9 to 9.9, 9.10 to 9.10, 9.12 to 9.12, 10.1 to 10.1, 10.3 to 10.3. Exception: Support of deployment of Rules Engine assets goes back to 9.9.</p> <p>Deployer does not deploy Software AG server assets across releases. For example, Deployer</p>

	<p>10.3 does not deploy Software AG server assets from 9.9 to 10.3.</p> <p>See <i>webMethods Deployer User's Guide</i> for information on Software AG servers supported by Deployer.</p>
Digital Event Services	Products that support Digital Event Services can exchange digital events with each other in releases 10.1 and later.
Terracotta BigMemory	Each release of Terracotta BigMemory can interoperate with Apama from the same Software AG release and earlier back to 9.8.
	Each release of Terracotta BigMemory can interoperate with MashZone NextGen from the same Software AG release and earlier back to 9.9.
	Each release of Terracotta BigMemory can interoperate with supported webMethods products from the same Software AG release and earlier back to 9.8.
	Each release of Terracotta BigMemory 4.3.x can interoperate with any other release of Terracotta BigMemory 4.3.x.
	<p>Terracotta BigMemory releases map to Software AG releases as follows:</p> <p>4.3.6 = 10.3 4.3.4 = 10.1 4.3.3 = 9.12 4.3.2 = 9.10 4.3.1 = 9.9 4.3 = 9.8</p> <p>See <i>Using Terracotta with webMethods Products</i> for information on webMethods products supported by Terracotta.</p> <p>See <i>Terracotta Compatibility with Other Software AG Products</i> for information on fixes to apply to Terracotta to support version interoperability.</p>

***Additional Tasks to Achieve Interoperability Between Integration Server and Universal Messaging**

Combinations of Integration Server and Universal Messaging that are marked with an asterisk (*) in this document require additional work to achieve interoperability, as follows:

1. Go to the *Software AG_directory/UniversalMessaging/lib* directory.
2. Copy the *nAdminAPI.jar*, *nClient.jar*, and *nJMS.jar* files from the Universal Messaging installation to the *Software AG_directory/common/lib* directory for the Integration Server installation.
3. Restart Integration Server.
4. If you install a fix that updates the client libraries in the Universal Messaging installation, repeat the steps above. Do not install any Universal Messaging Common Libraries fix to Integration Server because it would overwrite the copied client jars.
